Your Evil Controller comes with 20 customizable profiles.
They operate just like classes in Call of Duty®
Simply select the profile (class) and assign mods (perks).

By default, the first 10 profiles have a fire rate equal
to that of their profile number. For example,
profile 5 = 5 shots per second. Learn how to modify
these defaults under **ADJUSTABLE RAPID FIRE.**

**UPON PROFILE ACTIVATION,
PROFILE 1 WILL AUTOMATICALLY BE SELECTED.**

Each profile has its own adjustable rate of fire

It's possible for the rate of fire to be so fast that it doesn't register in-game. Slowing automatic weapons down to reduce recoil and increase accuracy can be effective. Features 15,000 speed increments.

⊕ **TOO FAST**
Weapon stutters/won't fire

EVIL RAPID FIRE INCREMENTS

GOAL — **PERFECT**
Ideal fire rate for selected weapon

ⓘ **TOO SLOW**
Weapon fires too slowly
