Your Evil Controller comes with 20 customizable profiles. They operate just like classes in Call of Duty®. Simply select the profile (class) and assign mods (perks).

By default, the first 10 profiles have a fire rate equal to that of their profile number. For example, profile 5 = 5 shots per second. Try them out and see how you like them. See **SECTION 3: ADVANCED MODS** to learn how to tweak these defaults.

**UPON PROFILE ACTIVATION,
PROFILE 1 WILL AUTOMATICALLY BE SELECTED.**

SELECT A PROFILE

Tap □ (profile #) of times to choose a desired profile.

HOLD + HOLD × **PROFILE#** Hold for 2 seconds.

20 CUSTOMIZABLE PROFILES

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |

DEFAULT FIRE RATES

2 ADDING MODS

Select a profile and enter the following button combos to activate the mods of your choice. Test in a private match.

Note: If using **TRIGGER SWITCH**, the following combos that reference **L2/R2** will be activated by **L1/R1**.

RAPID FIRE

Increase the rate of fire of semi-automatics weapons.

[D-PAD] + [R2 HOLD] + [PULL] Hold for 2 seconds.

To optimize the rate of fire in your game take a look at Advanced Mods to adjust your rate of fire.

LEFT TRIGGER RAPID FIRE

Increase the rate of fire of semi-automatics weapons equipped on your left trigger.

[D-PAD HOLD] + [L2 PULL]

AKIMBO RAPID FIRE

Increase the rate of fire on both triggers while dual wielding.

[L2 HOLD] + [R2 HOLD] + [D-PAD TAP]

AUTO SCOPE / AUTO RUN
[D-PAD HOLD] + [LS CLICK]

To enable Auto Run, tap L2 while moving.

DROP SHOT

Default Button Layout: Press **X** to stand up and keep Drop Shot active. Press **O** to stand up and deactivate Drop Shot.

Tactical Button Layout: Press **X** to stand up and keep Drop Shot active. Press **RS** to stand up and deactivate Drop Shot.

DEFAULT

[D-PAD] + [O]

OR

TACTICAL

[D-PAD] + [RS]

TACTICAL RAPID FIRE

Toggle Rapid Fire on/off. Useful when primary and secondary weapons have different fire rates.

1. Activate mod. Pressing **△** to swap weapons will also toggle Rapid Fire on/off.

   [D-PAD HOLD] + [△ TAP]

2. Toggle Rapid Fire on/off without switching weapons.

   [△] + [△] [DOUBLE TAP]

3. Return to standard Rapid Fire.

   [D-PAD HOLD] + [R2 PULL]

AUTO SPOT *Battlefield 4® Only*

[D-PAD HOLD] + [R1 CLICK]

Automatically spot an enemy if they appear on screen.

3 ADVANCED MODS

ADJUSTING RATE OF FIRE

[D-PAD HOLD] + [R2 HOLD] Hold for 2 seconds.

[D-PAD] = Increase rate of fire.

[D-PAD] = Decrease rate of fire.
TAP to increase by one step. HOLD to increase continuously.

[D-PAD] = Lock rate of fire.

It's possible for the rate of fire to be so fast that it doesn't register in-game. Slowing automatic weapons down to reduce recoil and increase accuracy can be effective. Features 15,000 speed increments.

EVIL RAPID FIRE INCREMENTS

(+)

TOO FAST
Weapon stutters/won't fire

GOAL — **PERFECT**
Ideal fire rate for selected weapon

TOO SLOW
Weapon fires too slowly

(-)

FAST RELOAD *Call of Duty: Ghosts*
Call of Duty: Modern Warfare

Reload weapons very quickly. It functions like the Sleight of Hand perk, but does not animate in a similar manner. Because weapons reload at different rates, Fast Reload must be programmed and adjusted accordingly.

[D-PAD HOLD] + [□ TAP]

1. Equip your gun of choice.
2. Fire off a few rounds.
3. Press and hold **d-pad down** and **□** to reload.
4. Release **d-pad down** and **□** when the bullet counter shows a full magazine.
5. Fire off a few more rounds.
6. Test the reload by tapping **□**.
7. Hold **R2** after tapping **□** and your gun will immediately fire once the Fast Reload is complete. The animation may appear "glitchy", but that's just the mod cutting away the unnecessary animation.

   Note: Holding **d-pad down** and **□** will restart the programming process.

JITTERMOD (AUTO BURST)
Call of Duty: MWR Only (M16A4)

Enter a profile then,

[D-PAD HOLD] + [X TAP]

Activating jitter will disable Rapid fire. Repeat function to disable jitter and reactivate Rapid Fire.
