Your Evil Controller comes with 20 customizable profiles.  
They operate just like classes in Call of Duty®.  
Simply select the profile (class) and assign mods (perks).

By default, the first 10 profiles have a fire rate equal  
to that of their profile number. For example,  
profile 5 = 5 shots per second. Learn how to modify  
these defaults under **ADJUSTABLE RAPID FIRE**.

**UPON PROFILE ACTIVATION,  
PROFILE 1 WILL AUTOMATICALLY BE SELECTED.**

## 2 SELECT/CLEAR PROFILE

### SELECT A PROFILE

Tap **X** (profile #) of times to choose desired profile. For example, tapping **X** 5 times = profile 5.

Hold for 2 seconds.

### CLEAR ALL

Clear all functions in current profile.

Hold for 2 seconds.

## 3 PROGRAMMING MODS

### RAPID FIRE

Increase the rate of fire of semi-automatics weapons.

See **Advanced Mods** for adjusting you rate of fire.

### LEFT TRIGGER RAPID FIRE

### AKIMBO RAPID FIRE

## 4 ADVANCED MODS

### ADJUSTABLE RAPID FIRE

Hold for 2 seconds.

- = Increase rate of fire.
- = Decrease rate of fire.
- = Lock rate of fire.

TAP to increase by one step. HOLD to increase continuously.

Each profile has its own adjustable rate of fire

## 5 PROFILE FEATURES

### CHECK PROFILE #

Check current profile number. Pulse/Rumble indicates profile. For example, 5 pulses/rumbles = profile 5.

### TOGGLE PROFILES ON/OFF

It's possible for the rate of fire to be so fast that it doesn't register in-game. Slowing automatic weapons down to reduce recoil and increase accuracy can be effective. Features 15,000 speed increments.

### LOCK

Prevent mods from being turned on/off during gameplay. Hold for 3 seconds. When LED pulses, release.

### MASTER RESET

Restore the controller to factory settings. Do not perform this operation unless you want to overwrite all of your customized profiles. **This action cannot be undone.**

**Note:** Mods must be toggled off in order to perform Master Reset.

Hold for 10 seconds
